Engineering collision repair...

The Problem

- Escalating cost of replacement OEM headlamp assemblies
- The risk of total-loss insurance claims
- Damaged headlamp tabs are virtually non-repairable in a collision event
- OEMs are branding headlamp components to exclude aftermarket lamps as a collision repair option
- Current tab repair methods are not verified, tested and are sub-standard

The Need

- A headlamp tab repair option that is a fraction of the cost of an OEM headlamp assembly
- A headlamp tab kit that allows a broken mounting tab to be repaired properly
- Restoration of the original branded OEM lamp
- A repair option that surpasses the industry lighting standard vibration test and is CAPA Verified
- A kit made using a validated manufacturing process and made in the USA

The Solution

- The CRS Headlamp Tab Repair Kit
- A rigorously tested and engineered tab repair solution
- A Fraction of the cost of a new replacement headlamp assembly
- CAPA Verified
 - Auto industry lighting standard vibration tested
 - Manufacturing process verified and audited
- Simple to install
